

1. Use the table below to collect data about your grades. Write your current overall % for each of your classes in the table.

Class	Overall % & Letter Grade	# 0's in that class (count them up)	# "F" grades in class	# "A" grades in class	Area of strength (use summary column & include average %)	Area of weakness (use summary column & include average %)
1 st						
2 nd						
3 rd						
4 th / 5 th						
6 th						
7 th						
8 th						

2. In what class do you have the lowest grade? What percent?
3. How many zeroes on assignments do you have in the class with the lowest overall grade?
4. What is your overall area of weakness in the class with the lowest grade?

5. What is your overall area of strength in the class with the lowest grade?

6. In what class do you have the highest grade? What percent?

7. How many zeroes on assignments do you have in the class with the highest overall grade?

8. What is your overall area of weakness in the class you have the highest grade in?

9. What is your overall area of strength in the class you have the highest grade in?

10. How many total zeroes do you have across all of your classes combined?
